

BALTIMORE CITY SAFE START INITIATIVE

REVISED IMPLEMENTATION PLAN JANUARY DECEMBER 2004

During Year 4, the Baltimore City Safe Start Initiative (BCSSI) will focus on continuing the implementation and enhancement of strategic planning of a comprehensive system of services that will prevent and reduce the detrimental effects suffered by young children, their families, and communities as a result of exposure to family and community violence. Another primary focus during Year 4 will be on identifying and reducing the cultural and systemic barriers that deter the most vulnerable families from seeking and using mental health services. Through persisting collaborative efforts with all of the supporting leaders and organizations, child serving providers, parents and public and private agencies that contributed to the Year 3 implementation. BCSSI plans to maintain and exceed the collaborative process that seeks to address the needs of children and families harmed by the impact of exposure to family and domestic violence. Sustainment of CEV training and ECMH training will be another focus during Year 4. Strategic planning for sustainability will be weaved into all aspects of collaboration.

BCSSI's strategy development is aiming to support the needs of Baltimore's most vulnerable communities by implementing strategies that will result in:

- Community awareness and education about the negative effects of domestic and community violence on children 0-6.
- Early identification of children and families who are negatively impacted by exposure to violence.
- Early childhood mental health training for mental health professionals who interact with young children.
- Appropriate mental health resources and services for young children.
- Accessible community –based services.
- Appropriate referrals to a coordinated, comprehensive network of services.
- Sustainable services that will remain in community.
- System change among the Key Agencies that respond to incidents of domestic violence.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

COMMUNITIES AND TARGET POPULATION

The unrelenting escalation of community and domestic violence supports the continuity of efforts in the two pilot communities and the incremental expansion into the SW/HP and HEB communities during Year 4. As of September 25, 2003, 198 murders occurred in the City as compared to 191 murders at the same time in 2002. The gradual expansion also supports CDCP's movement into SW/HP. Urban Behavioral Associates, the SS contracted mental health provider that provides the intervention services, is expanding its services into HEB and has agreed to provide services in this area of the City as well as SW/HP. Limitations on funding necessitated the closing of the Success by 6® program in Park Heights. The community will remain as a target demonstration area. The services of Safe Start are perhaps more solely needed due to the loss of the Success by Success By 6® services.

Demographics for Historic East Baltimore and Sandtown Winchester/Harlem Park Communities

The Historical East Baltimore Community is 2 square miles in size. With a population of 38,906, HEB contains the largest adult population among the Success By 6® communities. The percentage of the children living in this area, between the ages of 0-4 is 7.3%. The average income is \$29,763 compared to the City average of \$40,828. The unemployment rate of 10% exceeds the City's 6% rate and 34.6% of the families living in this community fall within the poverty level. The percentage of female-headed families in poverty with children less than 5 years of age is 56.7%. The substantiated child abuse/neglect rate per 1,000 (age 0-17) is 19.6% as compared to the city rate of 13.4%. The homicide rate (per 100,000) is 56.5% while the juvenile arrest rate (per 100,000) for ages 10-17 is 209.5, the highest in the City.

DEMOGRAPHICS FOR SANDTOWN WINCHESTER/HARLEM PARK

The Sandtown Winchester/Harlem Park community is .08 in square miles, the

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

smallest in area among the targeted communities. Sandtown- Winchester has a population of 8.9% for the entire city. The average number of children 0-4 is 2,165 and the number of female-headed households is 56.9%. The average family income for the area is 25,599, compared with \$40,828 for Baltimore City. Child abuse/neglect percentages for Sandtown- Winchester are 17.6%(per 100,000 age 0-17). The homicide rate is 91.5% (per 100, 000).

GOALS, OBJECTIVES AND INTERVENTION STRATEGY

The goals and objectives for Year 4 implementation reflect the core components of BCSSI's strategies: **Community Awareness, Screening/Assessment, Mental Health Intervention Services/Treatment and Service Linkage, Early Childhood Mental Health Training, and System Enhancement in Response to Family Violence**. The goals and objectives remained the same with the exception of an added goal that relates to systems integration and enhancement (Goal 5). BCSSI plans to implement the following goals and objectives:

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Goal 1: Broad Community Awareness of the impact of child exposure to violence.

Obj. 1.1: Provide community education on the impact of exposure to violence on children 0-6

Obj. 1.2: Build community awareness of Safe Start Intervention Services available for children 0-6 impacted by exposure to violence

Goal 2: Early and consistent detection of young children exposed to violence.

Obj. 2.1: Develop validated screening protocol for early childcare agencies to use to screen for impact from exposure to violence in children 0-6.

Obj. 2.2: Provide training to child-serving agencies on the appropriate implementation of screening protocol.

Obj. 2.3: Expand training to first responders, such as, CDCP, domestic violence, police, family court and child protective services to provide trauma

Goal 3: Young children identified as impacted by exposure to violence receive mental health services in their communities from a provider who is trained in early childhood mental health and childhood exposure to violence.

Obj. 3.1: Train mental health clinicians in assessing and treating impact from exposure to violence in young children.

Obj. 3.2: Work with BMHS to identify early childhood trained mental health clinicians to provide community-based diagnostic assessment and treatment of CEV.

Obj. 3.3: Ensure project sustainability by linking Safe Start services to existing funding sources (e.g., Medicaid).

Obj. 3.4: Identify policy or procedure changes needed within and across participating child-serving agencies and treatment providers to improve identification, assessment and referral of children 0-6 impacted by violence.

Obj. 3.5: Administer Life Domain Assessment to identify child/family strengths, resilience and areas of service needs.

Goal 4: Young children identified as impacted by exposure to violence have access to improved, appropriate community based services.

Obj. 4.1: Provide CEV training to service network providers.

Obj. 4.2: Provide service linkage to assist families of young children exposed to violence with obtaining other appropriate needed services.

Obj. 4.3: Provide an electronic resource directory for Safe Start providers to have access to referral resources.

Obj. 4.4: Develop procedures to follow-up with families of children 0-6 screened, assessed, and treated.

Goal 5: Enhance the coordination of services among Key Agencies that respond to incidents of family violence.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Obj. 1.: Develop strategies that will ensure that Key agencies become knowledgeable about the current process of identifying, responding to and providing services to victims of family violence.

Obj. 2.: Develop strategies that will create a continuing forum for Key Agencies to collaborate around response to family violence.

Obj.3 Share and incorporate resources among Key Agencies.

Obj.4: Develop strategies to incorporate policy changes in Key Agencies.

Obj.5: Explore legislative changes that promote positive outcomes for young children and families.

Description of Safe Start Intervention Services (SSIS)

The Safe Start Intervention Services (SISS) is an intervention strategy designed by BCSSI and collaborative partners to respond to the needs of children 0-6 who have been identified through a validated screening process to have been negatively impacted by exposure to family and community violence. The screening validation study is continuing therefore, validated questions have not been developed. To move forward with the implementation of SSIS, a direct referral process was developed so that referrals could be made for intervention services within the original targeted communities. The direct referral process will remain as another entry point for SSIS. Presentations on the direct referral procedure were made to Key Agencies at which time referral forms were also distributed. The process was added to the SSIS Procedures Manual.

BCSSI proposes to build the SSIS services into the structure and programming of existing community-based agencies. An incrementally planned rollout throughout Year 5 will be developed. During Year 4, the Initiative will expand into two additional communities, Sandtown/Winchester/Harlem Park and the Historic North and South East Baltimore communities. The expansion is in tandem with the expansion of CDCP and Urban Behavioral Associates, (UBA) the contracted mental health agency that implements SSIS.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

What does SSIS Provide?

There are four major components of SSIS:

- Screening
- Assessment
- Mental Health Services
- Service Linkage

Screening

An interim consensual screening tool is used by UBA during the initial appointment with the family. The purpose of the screening is to determine whether or not a child has been negatively impacted from exposure to violence and is in need of help.

Staff in child serving agencies that conduct intake will receive training on the validated screening questions and protocol. Train-the-trainer sessions will be conducted to ensure that all staff responsible for intake is knowledgeable about CEV and the screening questions. Technical assistance will be provided by BCSSI to assist agencies to incorporate questions into intake processes.

The screening validation study is expected to be completed by mid-year of 2004. UM has consented to continue the study at a no cost extension. Upon completion of the validation study, the screening protocol will be piloted in five agencies. CDCP will also incorporate the screening questions in their trauma response for the children who are younger than six. Through contact with children in child serving agencies, other trigger points for screening may occur as a result of either a report of an incident of exposure or observation of behaviors associated with impact from exposure to violence by staff or parents. Staff in child serving agencies will receive CEV training. Parents as first responders will also be offered CEV training.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

The SSIS process for intervention services is applied as follows:

If a screener receives a “positive” response to the screening questions and upon the parent's consent, a referral is made to SSIS. If there is no positive response on the screening form, but the screener still believes there may be some family issues, the screener will make any appropriate community referrals.

Assessment

A child who screens in as negatively impacted and who is referred to SSIS will receive a Life Domain Assessment (LDA) that is administered by an ECMH trained clinician. The assessment is used to determine the extent to which the exposure to violence has impacted the child, the strengths and resilience of the child and family and the services needed to ameliorate the impact of violence. The first step for the clinician in completing the LDA is to first identify what information already exists in each of the child's domains. The Service Linkage staff begins collecting the pieces of the Life Domain Assessment, including Home and Family, Community and Supports, Education and Development and a complete Mental Health Assessment. The trained MH clinician will review the results of the assessments to determine whether there is any impact of exposure to violence. If it is determined that there is no impact at this stage, there is no further case activity, however, the Service Linkage Staff will offer community referrals to the family to address any needs identified in the Life Domain Assessment. (See attached Safe Start Intervention Services Procedures Manual, Assessments section)

Mental Health

If it is determined that the family does indeed suffer some impact from exposure to violence, then the Mental Health Assessment is reviewed a second time to determine whether a mental health diagnosis can be established. A mental health diagnosis will assist the mental health agency in securing funding for additional services for the family.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

If the mental health agency determines that a family has a mental health issue that resolves into a diagnosis (from the DSM-IV Manual), the trained mental clinician and the Service Linkage staff would coordinate efforts to address the families' needs.

The LDA ad-hoc committee decided that the trained mental health clinician would determine the best mode of intervention based on assessment findings. For young children, play therapy may be a form of treatment while group therapy may serve as an intervention for five and six year olds. Therapy may be used in with the parent in situations where attachment and bonding may not have existed prior to the exposure impact. Clinicians may also work with the child's teachers in Head Start and childcare centers to enhance the classroom staff's capacity in relating to the child who has been negatively impacted in the classroom setting. The ECMH training series includes a segment on clinical interventions for young children.

A child who is assessed as being negatively impacted by exposure to violence and manifests PTSD symptoms will be administered the Preschool PTSD Treatment Protocol developed by Dr. Michael Scheeringa. Clinicians will use a decision tree developed by Dr. Scheeringa to determine if families meet the criteria for the treatment protocol. .

Service Linkage

If there is no need for mental health services, the local mental health agency will attempt to link the family to partner agencies to address the needs found in the Life Domain Assessment.

Upon completion of the service delivery plan, the service linkage staff person convenes a service-planning meeting. Membership at the service-planning meeting includes the mental health clinician, service linkage staff and the parent. The clinician reviews the recommendations made with the parent. Decisions regarding the service

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

plan are finalized and each individual present signs the service delivery plan.

Following the meeting, the service linkage staff member and the parent work together to establish contacts/make referrals to various services in order to achieve the goals identified in the service plan. The service linkage staff person will be responsible for assisting families in linking to other services identified in the plan. The service linkage staff person will follow-up with the parent to determine the success of the linkages and provide further assistance if needed. A customer satisfaction survey will be developed for use by the family to provide feedback about the service linkage system.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

GOAL 1: Broad Community Awareness of the impact of child exposure to violence.

Outcome: Increased community awareness.

Objective 1.1: Provide community education on the impact of exposure to violence on children 0-6.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Develop a training calendar that delineates a rollout schedule of training for 2004	January-February, 2004	SSTC Community Sub-Committee	<ul style="list-style-type: none"> • BCCCRC • Head Start Programs • Public-Private Agencies • Child Care Provider Organizations • CDCP • Success By 6® • KKI

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Complete CEV training manual format for duplication and use in train-the-trainer sessions	March 2004	SSTC Manual Committee	<ul style="list-style-type: none"> • DSS • Child Care Provider Organizations • BCCCRC • Baltimore City Community College
Finalize Train-the-Trainer sessions (#'s, length, collateral materials, logistics, etc.)	January and February 2004	SSTC	<ul style="list-style-type: none"> • DSS • Child Care Provider Organizations • BCCCRC • Baltimore City Community College
Recruit at least 3 persons from The Train-the-Trainer sessions to begin training	April 2004	SSTC SSPC Community Sub-Committee	<ul style="list-style-type: none"> • DSS • Child Care Provider Organizations • BCCCRC • Baltimore City Community College

SS training coordinator will continue to pursue opportunities to present CEV awareness sessions and trainings by attending community meetings/events and making follow-up contacts with entities that expressed interest. Increasing the number of parent presentations is a goal for year 4. Several childcare centers have agreed to recruit parents for training.

Increased community trainings are expected as a result of collaboration with the Kennedy Krieger Family Center, recipient of a 4 year SAMSHA grant under the National Child Traumatic Stress Initiative. SS agreed to provide CEV awareness presentations to parents and the community identified by KKF.

Elementary schools that incorporate pre-K programs will be approached as a resource to provide awareness sessions for parents and training for teachers. In addition, high schools with child development curricula will be recruited for student training.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

The 2004 CEV training calendar is found in **Attachment #1**.

A critical training task will be the finalization of the CEV training manual format for use in-the trainer sessions. The SS training coordinator will convene a working committee to accomplish this task. Several recommendations for membership have been received.

A total of 8 persons have expressed interest or have been approached by SS to become the first CEV trainers. These persons represent disciplines such as child welfare, childcare, clergy, child development, nursing, and substance abuse. The first train-the-trainer session will be conducted in early March.

Objective 1.2: Build community awareness of Safe Start Intervention Services available for children 0-6 impacted by exposure to violence.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

The screening validation study was not completed during Year 3 as expected. The primary difficulties centered around:

- The inability to start study at a strategic time point. Due to the training that was necessary for the assessment tools, the study began around May. At this time, the Head Start centers were gearing down for summer closings or abbreviated summer programs.
- The recruitment of subjects by staff at the identified screening sites. The largely paraprofessional staff had some bias toward research studies, therefore they did not administer questionnaire during intake or approach parents.
- Reluctance on the part of parents to participate based on biases about research, stigma associated with mental health and fear of removal of their children by CPS
- Loss of staff in Head Start programs, loss of one Success By 6® site and another family support site due to budget cuts.

During November 2003, a revised concrete and deliberate method was developed to obtain participants for the study. It was determined with the cooperation of site directors, each site would provide screens based on 20% of the total families that are served. At the end of each calendar month a review of each site's numbers will be made. In order to solidify this process a referral submission procedure was established along with "refresher screening trainings" on an as-needed basis. Refresher training was necessary due to the lag time between the initial training and the actual screenings. Two additional sites were added as another mechanism to boost the number of study participants.

UM has agreed, as per contractual terms, to extend the study through May 2004 at no cost to BCSSI.

Objective 2.2: Provide training to early childcare agencies on the appropriate implementation of screening protocol.

UBA has planned to increase the number of clinicians on staff that will be able to administer Safe Start Intervention Services. Training will be provided in January 2004 to five additional clinicians on the LDA protocol, child assessments and the PTSD treatment protocol.

The SS Liaison has identified a team of early childhood, clinical, and domestic violence professionals to produce a training manual based on the topics and information presented during the ECMH training series. This manual is one of the sustainable aspects of the ECMH training. One of the sustainability goals is to request the current trainers to continue the presentations. Safe Start will negotiate with BMHS to continue to provide oversight of the training series.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Objective 3.2: Work with BMHS to identify Safe Start trained mental health clinicians to provide diagnostic assessment and treatment in targeted communities.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS

Develop competencies (i.e. needed training, skills, etc.) for agencies interested in being included on SS mental health roster	June-December 2004 and continuous through Year 5	SS Evaluator SS Research Assistant	<ul style="list-style-type: none"> • BMHS • Baltimore City Mental Health Provider Network

Starting in January 2004 a survey form (**Attachment #3**) will be mailed to participants who attended two or more ECMH training sessions during 2003. The second set of surveys will be mailed following the last ECMH training in December 2004. Responses will be used to determine how attendees are using the information and knowledge presented. Additionally, the responses will help SS to identify agencies who are incorporating and responding to early childhood mental health practices and needs. Following the review of the surveys, those agencies presenting the most promise for incorporating best practices will be contacted to determine interest in providing SSIS. Together, the interested agency and SS will develop needed competencies. SS will provide resources for training.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Objective 3.3: Ensure project sustainability by linking Safe Start services to existing funding sources (e.g. Medicaid).

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS

Utilize current Medicaid system for 100% of reimbursable mental health services	January 2004- Year 5	SS Mental Health clinicians	<ul style="list-style-type: none"> • BMHS • UBA

NCL will be used a resource to obtain this information. This information will be shared with the Baltimore Mental Health Systems for applicability and dissemination. Safe Start providers will be monitored for use of additional funding resources.

A review of UBA's utilization of Medicaid will be conducted during 2004.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Objective 3.4: Ensure project sustainability by linking Safe Start services to existing funding sources (e.g. Medicaid).

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Increase awareness of ECMH among child serving agencies by: 1.Continuing to provide training as part of BCCCRC's training calendar. 2.Meeting with Baltimore City Head Start Training Coordinator to discuss incorporating ECMH into training calendar	January 2004 – December 2004	Training Coordinator, Safe Start Liaison	<ul style="list-style-type: none"> • Head Start • BCCCRC • BMHS
Continue to assist child-serving agencies in incorporating ECMH training into professional development protocol.	January 2004 – December 2004 and continuous through Year 5	Training Coordinator, Safe Start Liaison	<ul style="list-style-type: none"> • Head Start • BCCCRC • BMHS
Link UBA Safe Start staff with BCCCRC's Early Intervention Project and KK Family Center clinicians to leverage resources	January-March 2004	SSPC SS Liaison	<ul style="list-style-type: none"> • UBA • BMHS • KKI • BCCCRC

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Continue to present ECMH trainings as incorporated into BCCCRC's quarterly training calendar. The number of trainings are determined by BCCCRC and are based on the number of persons who register for the training.

During 2003, the initial linkage occurred by presenting information about SSIS and the direct referral process with the BCCCRC's Early Intervention Project. During 2004, a closer linkage will be made through the development of a protocol between UBA and BCCCRC. The protocol will include areas such as how SSIS is introduced to a caregiver, the involvement of the child care provider and sharing information among the varying entities.

Through membership on KKI's advisory committee for the Family Center funded through a SMASHA grant, SS will encourage the development of a protocol with UBA. The protocol will incorporate a mutual referral process to the KKI Family Center or UBA when appropriate.

GOAL 4: Young children identified as impacted by exposure to violence have access to improved, appropriate community based services.

Objective 4.1: Administer Life Domain Assessment to identify child/family strengths, resiliencies and areas of service needs.

Outcome: Improved referral system through coordinated service linkage.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Monitor the implementation of the Life Domain Assessment protocol	January 2004 – December 2004	Safe Start Liaison	<ul style="list-style-type: none"> • BMHS • UBA • Dr. Edda Weisberg
Investigate providing additional LDA training to Baltimore City mental health provider network	June 2004 – December 2004	Safe Start Liaison	<ul style="list-style-type: none"> • BMHS • UBA

Monthly reports are submitted by UBA to the SS Liaison who monitors the UBA contract. Copies of the reports are forwarded to SS Project Director. Another review of

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

of LDA's are conducted through verbal case specific reports presented by UBA during bi-weekly SS team staff meetings.

Objective 4.2: Fund a Safe Start Service Linkage position to assist families of young children exposed to violence with obtaining other appropriate needed services.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Explore avenues for integration of service linkage tasks i.e. PRP and other case management services	January 2004 – December 2004	Safe Start Liaison UBA	BMHS

UBA offers PRP services and has already integrated services. During Year 4, SS will request written reports that specify the integration. UBA's report will be incorporated into 2004 Semi-Annual Reports.

Objective 4.3: Provide an electronic resource directory for Safe Start providers to have access to referral resources.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Continue to provide training to UBA staff and perspective mental health providers on use of ERD	January 2004 – December 2004	SS MIS Specialist MIS Director	UBA
Maintain up-to-date information in ERD	January 2004 and continuous	MIS Director	Service providers

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Objective 4.4: Develop procedures to follow up with families of children 0-6 screened, assessed, and treated.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Review 100% of <i>Client Satisfaction</i> Surveys to evaluate the effectiveness of the 3 and 6 month follow-up procedures as developed in Year 3 and included in the SSIS Procedures Manual	January – December 2004 and continuous	SS Liaison UBA Staff	<ul style="list-style-type: none"> • UBA • BMHS

GOAL 5: Enhance the coordination of services among key agencies that respond to incidents of family violence.

Objective 5.1: Develop strategies that will ensure that key agencies become knowledgeable about current processes for identifying, responding to and providing services to victims of family violence.

Outcome: Systems are more coordinated, and providers are collaborating more to provide services for young children exposed to violence.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Engage senior staff from each key agency in an initial dialogue together to share operational procedures for responding to family violence	May 2004	SSPC Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Key agencies define a strategy to enhance systems response to the revised G-11 order	May 2004	SSPC Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR
Key agencies develop a MOU for commitment to enhancing response to DV	September 2004	SSPC Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR
Increase awareness of issues needing to be addressed to enhance coordinated responses to family violence (Share BCSSI's Policy Analysis Report)	January-December 2004 and continuous through Year 5	Policy Analysis Workgroup	BCPD DSS OSA HR
Increase the awareness of SS Initiative	January-December 2004 and continuous through Year 5	SSPC SSAC Policy Analysis Workgroup SS Council	BCPD DSS OSA HR

In October 2003, dialogue was initiated between representatives of BCPD and OAS, Felony Family Violence Unit in response to change in G-11 order. CPS has developed a proposal for system change within the BCDSS in response to DV. Technical assistance has been requested from SITTAP to develop action plans toward system integration.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Objective 5.2: Develop strategies that will create a continuing forum for key agencies to collaborate around response to family violence.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Finalize plans for symposium	January-April 2004	SS Council Policy Analysis Workgroup SSAC	<ul style="list-style-type: none"> • Key agencies
Key agencies present response at SS symposium	April 2004	SSPC Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA

The Symposium idea came out of the Policy Analysis workgroup as a way to augment the attempts to bring key agencies together to implement system change in reference to agency response to DV. The workgroup members represented each of the key agencies. Plans for the symposium started with the workgroup and was then presented to the SS council during the September 2003 meeting. Council representatives along with the workgroup have assumed the major responsibilities for putting the symposium together. Next steps or action plans are being formulized and will be presented to NCL for technical assistance.

Objective 5.3: Share and incorporate resources among key agencies.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Develop strategies for cross training	September 2004	Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR
Develop abbreviated referral material that will combine key agency service referral information	June 2004	Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR

Strategies will be included in action plans developed through TA with SITTAP.

**Baltimore City Safe Start Initiative
Implementation Plan January 2004-December 2004**

Objective 5.4: Develop strategies to incorporate changes in key agencies.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Develop written procedural protocols	September 2004 and continuous	Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR

Strategies will be included in action plans developed through TA with SITTAP.

Objective 5.5: Review and support legislative proposals that promote positive outcomes for young children and families.

TASK	TIMELINE	ASSIGNMENT	COLLABORATION PARTNERS
Identify legislative liaisons or the procedure for distribution of bills, laws, etc.	September 2004	Policy Analysis Workgroup	<ul style="list-style-type: none"> • BCPD • DSS • OSA • HR • FLBC
Include legislative updates in SS newsletter.	January-December 2004 and continuous through Year 5	SSTC	FLBC
